

Claims:

1. A video player device intended to play a video content that includes audio tracks and/or subtitles in a given number N of languages, said number N being higher than 5, characterized in that it comprises a user interface enabling the user to define a list of interesting languages, a memory for storing the list of interesting languages, and means for generating a dynamic menu intended to be displayed by filtering the languages of the audio tracks present on the disc in accordance with the list of interesting languages, said dynamic menu being such that languages of the list of interesting languages have priority in the dynamic menu.
2. A video player according to claim 1, characterized in that the dynamic menu is a player menu wherein the languages of the list of interesting languages in which audio tracks are present on the disc are displayed at the beginning of the dynamic menu.
3. A video player according to claim 2, characterized in that said player menu only includes the list of interesting languages, other languages being only accessible from a disc-based menu.
4. A video player according to claim 1, characterized in that the dynamic menu is a disc-based menu in which a list of languages stored in the disc based menu is reorganized before display in order to display the list of interesting languages in priority.
5. A method of generating a dynamic menu intended to be displayed on display means for enabling a user to easily choose a language from a list of languages in which audio tracks for a video are provided within a video content, characterized in that said method includes:
 - a step of acquiring a list of interesting languages,
 - a step of storing said list of interesting languages in a memory,
 - a step of comparing each language of said list of languages with said list of interesting languages,
 - a step of listing said language in the dynamic menu if said language is equal to one of the languages in said list of interesting languages,

- a step of ordering the languages listed in the dynamic menu in accordance with the order in which they appear in the list of interesting languages.
